### Event Summary

AfriFest will be a celebration of contemporary African Music & Culture to be enjoyed by the residents of Lambeth, London and the Country. Driven by current Popular Afrobeats musical artists it will also encompass modern African poetry, drama Art and fashion movements.

With authentic African Cuisine and drinks, all served in a stunning courtyard setting the smells, sites and sounds of Africa will fill the air.

The expansive safe site covers a large outdoor space and will be well secured and organised, with Security, health and safety personnel on and around the site keeping everyone attending safe. The two-day Festival at the start of September of this year will be a showcase of modern eventing with part of the funds generated being used to sponsor a studio for up and coming artists in Africa. We will also be one of the few events that take the environment into consideration by providing various recycling options throughout the site and insisting that all our suppliers comply with our own high environmental standards.

Situated on Streatham Common in South London's Borough of Lambeth it is intended to include as many local businesses and people in the Borough as possible in the staging of this exciting new addition to London and the UK's summer festival calendar. We have decided to concentrate our efforts primarily on local businesses first.
